DETAILED ACTION

Status of the Application

Receipt is acknowledged of the Response, Amendment and Applicant's Arguments/Remarks, all filed 02/21/11.

Claims 1-12 are pending in this action. Claim 1 has been amended.

* * * * *

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance are that the prior art of record (Ebert et al. – WO 96/19205; Chiang et al. – U.S. Patent No. 4,973,468; Min et al. – U.S. Patent No. 5,916,587; Toppo – U.S. Patent No. 5,985,860 and Franke et al. – WO 01/26637) do not disclose, teach, nor fairly suggest the structural features, elements and components of the presently claimed drug delivery device. Namely, the prior art does not disclose nor teach a drug delivery device that includes: (i) a unitary release liner covering which is releasably sealed to the sealing surface of the cover by a second seal, (thereby removing the need for a second membrane cover); (ii) nor is an adhesive layer disclosed that is adhered to a backing member, whereby the adhesive layer does not extend to the perimeter of the opening in the cover, so that a portion of the cover surrounding said perimeter of the opening is exposed to define a cover sealing surface.

In contrast, certain required elements of Ebert's device are not contained in the claimed device and are necessarily avoided by elements claimed in the subject invention.

Art Unit: 1615

The claimed drug delivery device provides an advantage over the prior art of record in that it uses fewer parts and, in particular avoids the adhesive overlay and the use of a peel seal disc that are central to Ebert's design. The instant invention is distinct in that it contains a unitary release liner covering which is releasably sealed to the sealing surface of the cover by a second seal, (thereby removing the need for a second membrane cover). Applicants have amended the claim to clarify this distinction. In addition, the adhesive overlay of Ebert overlies the reservoir forming backing layer. In contrast, the claimed device comprises an adhesive overlay adhered to the backing member wherein the adhesive layer does not extend to the perimeter of the opening in the cover, but which allows a portion of the cover surrounding the perimeter of the opening to be exposed to define a cover sealing surface. The defined elements and features are not disclosed, taught or suggested by the prior art of record. As a result, the drug delivery device as presently claimed would not have been obvious to one of ordinary skill in the art at the time the invention was made, based on the teachings of the cited art of record. Accordingly, the instant invention is rendered non-obvious and patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
